

Tiantian Chen **for** Ethical Affairs Chair

Briefing

I am an Mphil student at Department of Sociology. I get involved with CUSU Ethical Affairs Team through my role as MCR Environment Officer at Churchill. Though our Team is really effective in coordinating campaigns and advocating for green affairs, we have **some weakness**. First, after I elected as Environment Officer, I thought hard about what to improve in my college. I desired more **communication** with officers in other colleges to get inspirations. Second, despite great efforts in sending emails about campaigns, some students told me they still feel **less informed** about environment activities. To overcome the above weakness, I want to make CUSU Ethical Affairs Team **more supportive, communicative and impressive**.

To empower campaigns such as **Greener** and **Real Food** and the work of Environment Officers from JCRs and MCRs

To ensure that Cambridge invested its **£2.2 billion** endowment in companies that do not destroy environment.

To attract more colleges to **invest for social aims**

To cooperate with organizations and charities such as  to develop **more environment-related volunteering activities** for students to contribute to environmental sustainability in the local community

To promote

the University and colleges to pay the Living Wage at least **7.85** pounds/hour and use students' financial resources in a socially responsible way.

To communicate with students rather than to push them to act ethically

To apply to advocating for ethical issues
